

BOARD OF HEALTH REPORT

The following cities and towns had EEE positive mosquito samples: Hanson. Please see the results below, or refer to the attached document for additional details on these findings.

Species: *Culiseta melanura* Collection Date: 9/7/11 Town: Hanson County: Plymouth Agent: EEE

Species: *Ochlerotatus canadensis* Collection Date: 9/7/11 Town: Hanson County: Plymouth Agent: EEE

As a result of these findings it is strongly recommended to severely curtail outdoor activities from dusk to nightfall and from early dawn to sun up. If you must be outside during these hours it is strongly recommended you wear a mosquito repellent which contains at least 40% DEET.

It is strongly recommended that all school activities and sports refrain from outdoor practice and events during these hours. Above all, use good judgment. Young children and seniors are at the greatest risk, along with anyone with a severe medical history.
